**To Whom It May Concern:**

I am writing this letter on behalf of Yejin Oh, a student in my grade 12 communications technology class. Currently, Yejin is at the top of the class with a mark of 97%.

Her well-developed strategic and creative abilities are complemented by her fine-tuned and intuitive understanding of graphic design, website development, audio production and video production. She is also well-versed in the Adobe Creative Suite of software applications like Photoshop, Illustrator, Audition and Premiere.

On top of all of that, she is a hard-working, conscientious and dedicated student – not to mention a genuinely nice person. It is for all of the reasons stated above, that I highly recommend her for your Computer Science – Computation Arts Program.

Feel free to contact me for clarification or if you would like any further information about Ms. Oh.

Sincerely,

**Tal Lavee**
